## Pressure Sensitive Adhesives

All products were direct coated on 2 mil PET film at a coat weight of 1 mil dry thick, and tested on SS panels.  
(1) Direct coated on 2 mil PET film with a coat weight of 1 mil dry thick and tested on LDPE panel.  
(2) Transfer coated on 4 mil white vinyl with a coat weight of 1 mil dry thick and tested on SS panel.  
Note: The information provided is for the general information used to select the adhesive for certain applications. Do not use it as an official QA/QC specification. As with any products, always test the sample in the small scale first to determine the suitability before scale up to a larger scale or commercialization.
